4. Area of the action

Information: EUROCHIP pilot Studies

5. Aim and description of the work (for details see Annex 03)

Data Collection for the EUROCHIP Pilot Studies for breast cancer and colorectal cancers

6. Results of the work (for details see Annex 03)

- Date on pre-diagnostic events "first visit to general practitioner" and "first request of clinical appointment" are rarely available. They are unavailable in hospitals databases and hospitals medical charts. To get this information it is needed to conduct data collection at health centres level.
- Radiotherapy is done outside hospitals
- The data on "stage at diagnosis" are routinely available

7. Added Value of the work (for details see Annex 03)

The indicators on "Percentage of cancer cases with early diagnosis" and "Compliance with guidelines" are available or collectable with work and funds.

8. Participation in other Conferences/Meetings related to EUROCHIP
